

Alliance unveils its 25th messenger center

Bright Star Couriers, a division of Alliance Building Services, opened its 25th messenger center at 250 Park Avenue. The office building property is managed by Colliers ABR, Inc.

Via the Bright Star messenger center, all deliveries and incoming parcels which enter and exit the buildings are signed for by the messenger center staff and brought directly to the tenant by a Bright Star Couriers employee,

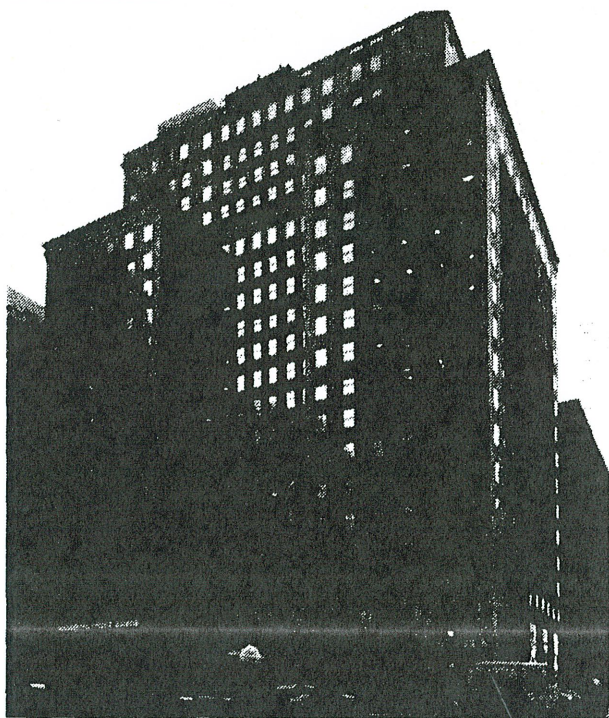

thereby avoiding property access to street messengers. To send a package from the building, tenants will call the messenger center, which will then dispatch a Bright Star Couriers staffer to retrieve the package.

“We are thrilled to be opening our 25th messenger center to date at 250 Park Avenue,” said Gary Green, CEO of Alliance Building Services. “With an average of 500 packages and other parcels entering and leaving these properties on a typical business day, the Bright Star messenger center pro-

vides a secure and equally resourceful service.”

“Messenger centers play a key role in enhancing building security by efficiently overseeing the inbound and outbound package traffic.” said Thomas Hogan, director of sales and operations, Bright Star Couriers.

“Bright Star messenger centers will be a wonderful addition to our building, benefiting tenants and visitors,” said, Jack A. Terranova, director of operations, Property Management Group, Colliers ABR, Inc. “Alliance’s reputation is outstanding and we look forward to the added value this messenger center will provide.”
